

Specification Amendments

Please amend the specification as follows:

On page 9, lines 17-20, the current application discloses the following equation:

$$E = \sum_{i=0}^{N-1} | \bar{w}_i |$$

Please amend the current application by including a square of the absolute value (underlined) in the equation, as follows:

$$E = \sum_{i=0}^{N-1} | \bar{w}_i |^2$$
